PROFESSIONAL RAFTER / SPEED SQUARES FOR INSTALLERS

12-in Speed Square
ORX-6812
Sold in Boxes of 8

7-in Speed Square
ORX-6811
Sold in Boxes of 12

Rafter or Speed Squares measure and lay out straight, 45° angled, and 90° angled lines. The flanged edge sits against a workpiece edge to check whether materials are square and to anchor the tool when marking lines. The flanged edge also provides a pivot point to measure and mark a range of angles. Their diagonal leg assists with marking rafter, trim, and stair angles. They are also used with plumb bobs when finding pitch on roof rafters and marking level lines along a plumb line.

- **Anodized Aluminum Finish**
- **Corrosion Resistant**
- **Light-Weight**
- **Long-Lasting**
