

Why SeamMaster™ by TRAXX?

LOW-MELT UNIVERSAL ADHESIVE

Signature Series tapes use a uniquely superior adhesive formulation. This universal adhesive bonds aggressively to all carpet backings. And, its low melting point gives better adhesive flow and penetration at lower iron temperature settings... reducing distortion and shrinking of today's heat-sensitive carpets.

EXPERIENCE

SeamMaster has been developing tapes for over 40 years, by producing its own hot-melt adhesives. This, combined with Traxx's additional engineered flooring installation products experience, makes the new SeamMaster family of tapes an even better one; superior tapes for today's carpet backings.

ENVIRONMENTAL COMMITMENT

SeamMaster pioneered green innovation with its tape products by reducing close to 40% of the petrochemicals, replacing them with natural ingredients. That's why these tapes produce less smoke and odor — ***you can smell the difference.***

Best Tape

- Superior bonding strength
- Advanced low-melt adhesive
- Universal - works on all backings
- 11 beads of adhesive
- X-tra wide center bead
- Heavy foot traffic: commercial & residential
- Lifetime Warranty

One Tape

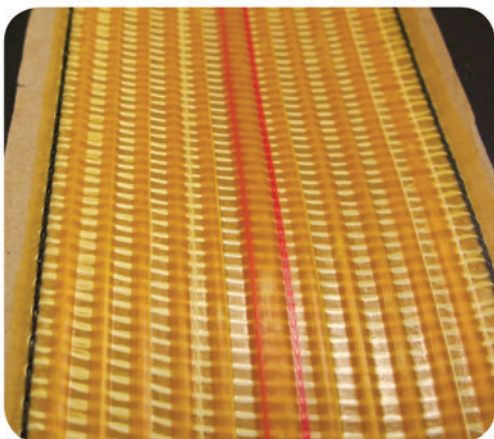

- Superior bonding strength
- Ultra-low profile
- Advanced low-melt adhesive
- Universal - works on all backings
- 11 beads of adhesive
- X-tra wide center bead
- Heavy foot traffic: commercial & residential

Smart Tape

- Great bonding strength
- Advanced low-melt adhesive
- Universal - works on all backings
- 9 beads of adhesive
- X-tra wide center bead
- Medium to heavy foot traffic: residential to light commercial

Handy Tape

- Good bonding strength
- Advanced low-melt adhesive
- 9 beads of adhesive
- Light to heavy foot traffic
- Residential use only

Signature Series Features

More natural ingredients – up to 40% less oil products

Pleasant, natural scent

Stronger, more aggressive adhesive

Multi-strand, poly fiber scrim for maximum strength

Attached scrim – no puckering, slipping or sliding

Lower-temp melt reduces damage to synthetic backings

Universal adhesive formulation

Fusion technology gives more even bead distribution
